0.1 Definitions

Definition 1 (Sequence). A sequence is a function $s : \mathbb{N} \rightarrow X$ for some set X .

Theorem 2 (Smale 1958). *There is a homotopy of immersions of S^2 into \mathbb{R}^3 from the inclusion map to the antipodal map $a : q \mapsto -q$.*

Proof. This obviously follows from what we did so far. □
